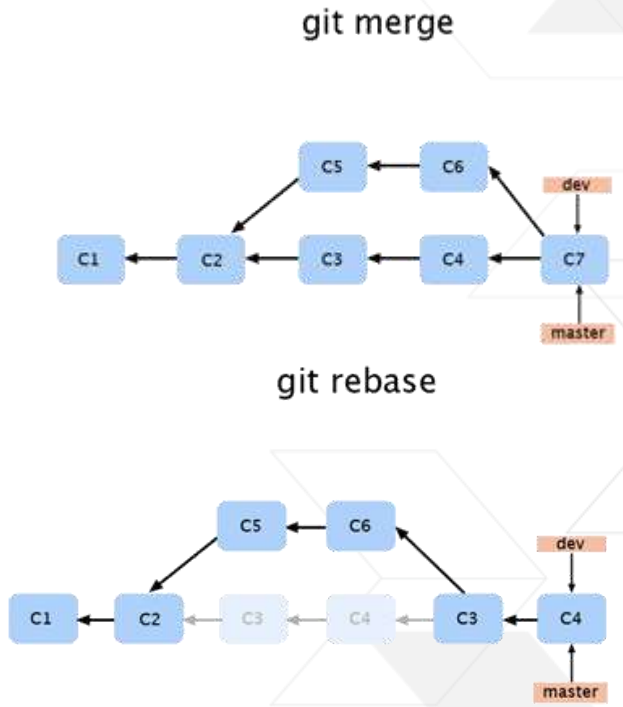
Rebase Kernel Tree

- **Merge-Tree**
  - Merges two separate branches into a single new branch going forward
  - Lose the history of what was different between the branches
- **Rebase Tree**
  - Creates a series of patches that can be applied cleanly to the HEAD node
  - Maintain history of development in the separate development paths



- **Single upstream kernel version per year**
- **Rebase patchsets with Vivado releases**
- **Rolling merge tree**
