

Product Discontinuation Notice PDN2003-09

Discontinue SystemACE MPM (Multi-Package Module) Product Family

Overview: Xilinx will discontinue the SystemACE™ MPM (Multi-Package Module) device product family.

Note: This notice does not affect the System CF (CompactFlash) or SystemACE SC (SoftController) families.

The following ordering codes will be discontinued:

XCCACEM16-BG388I
XCCACEM32-BG388I
XCCACEM64-BG388I

Reason For Change: The SystemACE MPM product family is currently manufactured at the Amkor Technology facility in Kwangju, South Korea. Amkor Technology has decided to streamline their product offerings by discontinuing ordering codes for mature products that have significantly declined in customer usage. Xilinx has introduced the Platform Flash PROM family as the high-density, cost-effective, small form factor alternative to the SystemACE MPM family. The Platform Flash PROMs offer many of the same features while requiring only a fraction of the cost and board space.

Key Dates:

Final orders accepted until November 10, 2004.

Final deliveries on or before May 10, 2005.

Device Replacement: The Platform Flash PROMs offer many of the same features while requiring only a fraction of the cost and board space and should be used as an alternative to the System ACE MPM devices.

Discontinued Part Number	Configuration Bits	Density Alternative Part Number	Configuration Bits
XCCACEM16-BG388I	16,777,216	XCF16P-FS48C or XCF16P-VO48C	16,777,216
XCCACEM32-BG388I	33,554,432	XCF32P-FS48C or XCF32P-VO48C	33,554,432
XCCACEM64-BG388I	67,108,864	2 of XCF32P-FS48C or 2 of XCF32P-VO48C	67,108,864

Assistance in planning for the replacement of the above devices is available. Please contact your [Xilinx Sales Representative](#) for more information.

Response: For additional information or questions, please contact [Xilinx Technical Support](#).
