

Product Discontinuation Notice PDN98005

Discontinuation of the XC3100A M-grade and B-grade (SMD) Products

Subject: Discontinuation of the XC3100A M-grade and B-grade (SMD) Products (note: this notice does not affect the commercial and industrial grades of the XC3100A)

Products Affected: All XC3100A M-grade and B-grade SMD (Standard Military Drawing) Products are as follows: XC3142A, 5962-95610, XC3190A, 5962-95611 and XC3195A, 5962-95612

Change Description: The M-grade and B-grade members of the above product family are being discontinued (all package and speed grades). This does not affect Xilinx offering of the C-grade and I-grade versions of the XC3100A family.

Reason For Change: Low customer demand for the M-grade and B-grade versions of the XC3100A family has not merited continued support. This discontinuation affects only certain low volume products in the Xilinx Military and Aerospace product line. Xilinx has recently received full QML certification and remains fully committed to the market as is evidenced by the recent introduction of the XQ4000X family, which are recommended replacements for the discontinued products. Support will continue for the XC3000 and XC4000 Military and Aerospace lines.

Key Dates: Last date to order any M-grade or B-grade versions of the XC3100A family is 1 July 2000, with final delivery on or before 1 October 2000. This allows more than two years to plan for this product obsolescence.

Response: No response to this notification is required. Requests for additional data or support should be made within 90 days of notification. Please address any questions you may have via e-mail at "pcn@xilinx.com", or directly by fax at 408 559 1368.
