Decision Not To Manufacture the XC4028XLA and the XC4036XLA in the HQ304 Package

Summary:

Although Xilinx initial product roadmaps indicated that the XC4028XLA and the XC4036XLA (in various speed and temperature grades) would be made available in the HQ304 package, the decision has now been made not to release this product-package combination to manufacturing. Technical considerations do not make the manufacture of these combinations feasible.

Customer Options:

Customers should consider utilizing the XC4044XLA in the HQ304 package for applications requiring the higher pin count of the HQ304. If you are already considering designs utilizing the XC4028XLA or the XC4036XLA in the HQ304 package, please contact your Xilinx sales representative for assistance in making this transition, and for pricing details.
